Profile

UI/UX designer with a BSc in Business Information Systems (GPA 3.95) and hands-on experience taking web products end to end — from user flows and wireframes in Figma through prototypes to polished, developer-ready interfaces. Recently led a five-person team delivering Mwasalaty, a multimodal Cairo transit PWA, in an Agile workflow. Strong in design systems and reusable component libraries, responsive and WCAG 2.1 accessible design, and HTML/CSS fundamentals — with the front-end background (Vue 3, TypeScript, Tailwind) to make design-to-development handoff smooth and implementable.

Experience

UI/UX Design & Development Intern, ITI (Information Technology Institute) — ICCP Jan 2026 – Jun 2026

- **Mwasalaty** — Led a 5-person team building a multimodal Cairo transit-planning and QR-ticketing PWA; owned end-to-end product design from user flows and wireframes through interactive prototypes to final developer-ready screens, and managed delivery across 5 phases in Linear using an Agile sprint workflow.
- Designed screen-level interfaces in Figma using established patterns — layout, spacing, hierarchy, interaction states and responsive behaviour — and built a reusable component library that kept screens consistent as the product grew.
- Designed bilingual EN/AR interfaces with full RTL support to WCAG 2.1 standards, translating complex multimodal routing, per-leg fare and payment requirements into simple, intuitive user journeys.
- Prepared files for handoff with annotations, specifications and asset exports, then implemented the designs in Vue 3 + TypeScript + Tailwind CSS — closing the design-to-development loop and resolving implementation questions directly.

Digital Banking & Fintech Intern, Commercial International Bank (CIB) Aug 2023 – Sep 2023

- Evaluated the UX of digital banking products, fintech interfaces and AI-driven customer-facing tools at one of Egypt's largest private banks, applying heuristic evaluation to identify usability gaps within an enterprise Agile environment.

WordPress Developer Intern, WAW-Book Jul 2024

- Designed and launched a fully responsive travel website (Island), owning layout, theming, visual hierarchy and the Amelia booking flow end to end.

Finance Intern, The Egyptian Airport Company Aug 2024

- Completed a cross-functional rotation across 4 departments, using Excel and Oracle ERP to turn raw data into structured reports — building the data literacy used to support design decisions with evidence.

Projects

InnerAura — Online Therapy Platform | Figma, Node.js, Express, PostgreSQL, Tailwind, Jitsi API Jun 2025

- Designed and built an end-to-end telehealth product: mapped multi-role user flows (patient, therapist, admin), designed the therapist-matching and video-session experiences, and delivered a responsive, WCAG-compliant front end.

Education

Helwan University — BSc in Business Information Systems GPA: 3.95/4.0 Aug 2021 – Jun 2025

Skills & Technologies

Design & UX: Figma, FigJam, Wireframing, Prototyping, User Flows, Design Systems, Component Libraries, Auto-Layout, Interaction States, Micro-interactions, Design Handoff (annotations, specs, asset exports), Heuristic Evaluation, Usability Testing, User-Centred Design (UCD), Design Thinking, Responsive Design, WCAG 2.1, Accessibility (a11y), Adobe Illustrator, Adobe Photoshop, Adobe Premiere Pro.

Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, Vue 3, Tailwind CSS, Bootstrap, WordPress, PWA (Workbox, IndexedDB).

Back-End & Data: Node.js, Express, PHP, PostgreSQL, MySQL, REST APIs, Python (Pandas, NumPy, Matplotlib), SQL, Power BI, Oracle.

Tools & Ways of Working: Git, GitHub, Linear, Agile/Scrum, Cross-Functional Collaboration, Stakeholder Communication, Team Leadership, AWS EC2, Microsoft Office, SEO.

Languages: Arabic — Native · English — Professional Working Proficiency · French — Beginner

Extracurricular Activities

Delegate, ThreeDos — Web Development Council *Built Service Hub, a freelancing platform.* Feb 2023 – Aug 2023

Member, ThreeDos — Graphic Design Committee Sep 2021 – Jul 2022
