Profile

UI/UX-focused front-end developer who builds responsive, accessible web applications (WCAG 2.1) and designs in Figma. Led a five-person team to build and deploy Mwasalaty, a multimodal Cairo transit PWA, on AWS. Works in Vue 3, TypeScript, Tailwind CSS, and JavaScript (ES6+) with a product mindset.

Experience

UI/UX Development Intern, ITI (Information Technology Institute), ICCP — Jan 2026 – Jun 2026

- **Mwasalaty:** Led a 5-person team to ship a multimodal Cairo transit and QR-ticketing platform of 3 apps (rider PWA, admin dashboard, operator scanner PWA; 52 routes in total) across 5 Agile phases in Linear, and usability-tested it with 6 users (5 riders, 1 operator).
- Architected the 29-route rider app in Vue 3, TypeScript, and Pinia with accessible EN/AR interfaces (WCAG 2.1, full RTL), OpenTripPlanner journey planning, PayMob payments, and offline-first support via Workbox and IndexedDB that keeps 95% of core features usable offline.
- Built a large part of the Node.js back end: 50 REST endpoints across 7 route modules (trip planning, ticketing, payments, admin) over an 8-table Supabase PostgreSQL database with Supabase Auth; deployed on AWS EC2.
- Co-built an LLM trip assistant on the Gemini API (Gemini Flash) that classifies trip intent and extracts origin and destination from free-text requests.
- Completed hands-on design work in design systems, component libraries, usability testing, and WCAG accessibility.

Finance Intern, The Egyptian Airport Company — Aug 2024

- Reconciled datasets and prepared cost reports during a 4-department rotation, using Excel (pivot tables, VLOOKUP, data validation) and Oracle ERP to turn raw data into structured entries.

WordPress Developer Intern, WAW-Book — Jul 2024

- Designed and launched Island, a fully responsive travel booking website on WordPress, owning layout, theming, and the Amelia booking integration end to end.

Digital Banking & Fintech Intern, Commercial International Bank (CIB) — Aug 2023 – Sep 2023

- Attended heuristic evaluation and usability assessment sessions on digital banking products, fintech interfaces, and AI/ML-powered customer tools, gaining fintech domain knowledge and exposure to enterprise Agile workflows.

Education

Helwan University, BSc in Business Information Systems — Aug 2021 – Jun 2025
GPA: 3.95/4.0

Projects

PwC Middle East Website Redesign, UX Case Study | *Figma* — Sep 2026

- Redesigned three PwC Middle East pages (landing, Egypt office locations, careers hub) as a self-initiated concept, simplifying navigation and layout while keeping PwC's brand identity.
- Designed mobile-first with modernised typography and spacing, a flat accordion menu, and a tap-based map with bottom-sheet office details; explored an EN/AR language toggle.

oneBite, E-commerce Web App | *Vue 3, TypeScript, Express, Prisma, PostgreSQL, Railway* — Aug 2026

- Built a two-person bakery storefront end to end: a 20-route Vue 3 and Pinia front end from a teammate's Figma design, and the full Express/TypeScript back end with 56 REST endpoints over an 18-model Prisma/PostgreSQL schema.
- Implemented delivery-slot and production-capacity reservations that stay correct under parallel checkouts, plus promotions, cash-on-delivery orders, and public order tracking.
- Built an owner dashboard secured with TOTP two-factor login; hardened the API with Zod validation, Helmet, and rate limiting; covered it with 46 Vitest/Supertest tests and deployed on Railway.

InnerAura, Online Therapy Platform | *Node.js, Express, PostgreSQL, Tailwind, Jitsi API* — Jun 2025

- Built the back end (REST APIs secured with JWT and bcrypt) and half of the front end for a team-built telehealth platform with multi-role accounts, therapist matching, and Jitsi video sessions.

Extracurricular Activities

ThreeDos Student Activity Sep 2021 – Aug 2023

- **Delegate, Web Development Council** (Feb 2023 – Aug 2023): Built Service Hub, a freelancing platform connecting clients with freelancers, using PHP, MySQL, JavaScript, and Bootstrap.
- **Member, Graphic Design Committee** (Sep 2021 – Jul 2022): Designed social media graphics, event posters, and banners.

Skills

UI/UX & Design: Figma, Adobe Illustrator, Photoshop, Premiere Pro, Wireframing, Prototyping, User Flows, Design Systems, Usability Testing, Design Thinking, User-Centered Design, Responsive Design, WCAG 2.1, Accessibility

Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, Vue 3, Pinia, Tailwind CSS, Bootstrap, WordPress, PWA (Workbox, IndexedDB)

Back-End & Data: Node.js, Express, Prisma, Supabase, PostgreSQL, MySQL, PHP, REST APIs, LLM APIs (Gemini), SQL, Python (Pandas, NumPy, Matplotlib), Power BI, Oracle ERP

Tools: Git, GitHub, Vitest, Docker Compose, Linear, Agile/Scrum, Linux, AWS EC2, Railway, Microsoft Excel, SEO

Soft Skills: Team Leadership, Teamwork, Presentation, Communication, Problem-Solving, Adaptability

Languages: Arabic (Native), English (Professional Working Proficiency), French (Beginner)
